

BETTER NV EDUCATION

BETTER NV BUSINESS

Investing in education is just plain good for Nevada business.

EDUCATION RAISES PEOPLE'S PRODUCTIVITY & INNOVATION

In addition to promoting entrepreneurship and technological advances, increasing the number of educated and skilled workers increases the number of workers who can perform tasks more efficiently.

QUALITY EDUCATION COMES FROM QUALITY TEACHERS

The quality of teachers matters greatly to student outcomes. An education system that values, supports, and attracts high quality teachers is one that will see a return on investment.

HIGHER INCOME MEANS MORE SPENDING POWER

35% of working Nevadans are below poverty level. Education plays a crucial role in securing economic and social progress and improving income distribution. Higher Nevada incomes means more cash flow in our economy.

A STRONG K-12 EDUCATION SYSTEM ELEVATES HOME VALUES

Because a better educated community earns more income, home-buying increases thus driving up our community's home value.

AN EDUCATED WORKFORCE PAYS OFF

Currently, Nevada is one of the least educated workforce populations. High-quality K-12 education can not only cultivate a stronger workforce for current NV businesses, but attract high-level corporations that rely on an educated workforce.
